

M-AMINE AANZOUR

3rd-year Networks & Telecommunications student (BUT) – Systems & Cloud

Seeking a 16-week end-of-studies internship (March to June 2027)

Passionate about systems, networks and the Cloud, I am looking for an internship to put my skills into practice. My studies have given me solid foundations in system administration (Windows, Linux, virtualization) and networking, along with an introduction to Cloud environments and containerization. My internship at La Poste also had me working on IT hardware and IoT devices, and deploying PCs and networks. I am eager to fully commit to new projects and deepen my expertise.

Colmar (France)

Driving licence (B)

Education

2024 - 2027

- BUT Networks & Telecommunications
- Dual degree / Engineering track (ENSISA)

IUT DE COLMAR

2023-2024

- Physics & Chemistry Baccalaureate

INSTITUTION AL WAHA (MOROCCO)

Soft Skills

Rigorous and motivated

Fast learner

Curious and proactive

Team player

Customer-oriented

Hobbies

- Football
- Video games
- Travel

Languages

English (C1)

French (fluent)

Arabic / Tamazight (native)

PROFESSIONAL EXPERIENCE

Infrastructure Technician Intern

La Poste - Mulhouse, Alsace / April 2026 – June 2026

- IT support (level 2) and participation in level 3 interventions, on site and remotely.
- Maintenance and management of La Poste's IT equipment in Mulhouse and across Alsace: workstations, network equipment, connected devices (IoT) and machines.
- Deployment of workstations (PCs) and commissioning of network equipment on site.

Burger King

- Customer service and effective communication
- Stress management in high-pressure situations
- Teamwork and collaboration

TECHNICAL SKILLS

Computer Networks

- Protocols: TCP/IP, IPv4/IPv6, DHCP, DNS, VLAN, LACP, BGP, MPLS
- Static and dynamic routing (OSPF), ACLs, proxy, VRRP redundancy
- Tools: GNS3, Packet Tracer, EVE-NG
- Multi-site network project: MPLS-VPN interconnection of remote sites
- Enterprise network project: LAN design with network services
- Cisco CCNA 1: Introduction to Networks

Operating Systems

- Windows Server: Active Directory, GPO, DNS, DHCP
- User, group and permission management
- Linux: administration and Bash scripting
- Virtualization: VMware, VirtualBox, Proxmox
- Security with pfSense (firewall, VPN)
- Linux: installing and configuring services (SSH, Apache or Nginx, Samba), permission management, Bash scripts

Programming & Development

- Infrastructure security with pfSense (firewall, VPN).
- Development in Python, CSS, HTML, SQL, Bash, C++, C
- IaC: Ansible, Terraform
- Containerization: Docker, Kubernetes
- Project: microservices banking application
- Project: cloud e-commerce architecture
